

# Provide peace of mind for those who need it most.

**Roundtrip is an easy-to-use ride booking platform for transportation requesters in the healthcare setting. We make it simple and fast for clinical staff to organize transportation on behalf of patients who need a ride to or from their point of care.**

Transportation is an important factor in access to behavioral health, addiction treatment and other social services. For populations with fewer resources, lack of transportation can be a significant barrier to care. When legitimate barriers, like transportation, aren't recognized, someone may be written off as resistant or non-compliant to treatment when in fact they cannot get to their care setting. At Roundtrip, we want to reshape how we engage with people and serve more individuals with behavioral health and addiction needs to ensure that transportation is no longer a barrier to the care they need.

**Book Rides Ahead of Time.** Help ensure that the patient can get to an appointment with the flexibility of arranging transportation up to weeks or months in advance.

**Save Time Arranging Transportation.** Leverage Roundtrip's ETA bidding technology and ability to simultaneously reach transportation companies to get the best pick up times and move patients faster.

**Repeat Rides for Recurring Appointments.** Ensure that transportation is an ongoing solution instead of a recurring challenge.

**Ride Notifications to Know When Patient Arrives.** From start to finish, stay informed along every step of your patients' journey.
